Abstract

One or two sentences providing a **basic introduction** to the field, comprehensible to a scientist in any discipline.

Two to three sentences of **more detailed background**, comprehensible to scientists in related disciplines.

One sentence clearly stating the **general problem** being addressed by this particular study.

One sentence summarizing the main result (with the words “**here we show**” or their equivalent).

Two or three sentences explaining what the **main result** reveals in direct comparison to what was thought to be the case previously, or how the main result adds to previous knowledge.

One or two sentences to put the results into a more **general context**.

Two or three sentences to provide a **broader perspective**, readily comprehensible to a scientist in any discipline.

The preliminary Romanian adaptation study of the Primal Beliefs Inventory

Methods

We report how we determined our sample size, all data exclusions (if any), all manipulations, and all measures in the study.

Participants

For the **first sample**, *1228 data* were collected between 2021-08-03 and 2021-12-31, 93.08% online and 56.60% female, age between 15 years and 75 years ($m=38.52$, $sd=12.15$). Between 2022-01-01 and 2022-11-16, *1326 data* were collected for the **second sample**, 92.91% online and 52.41% female, age between 15 years and 73 years ($m=33.55$, $sd=11.58$).

Material

Procedure

Data analysis

We used R (Version 4.2.2; R Core Team, 2022) and the R-packages *dplyr* (Version 1.0.10; Wickham, François, Henry, & Müller, 2022), *lubridate* (Version 1.9.0; Grolemund & Wickham, 2011), *papaja* (Version 0.1.1; Aust & Barth, 2022), *readxl* (Version 1.4.1; Wickham & Bryan, 2022), *timechange* (Version 0.1.1; Spinu, 2022), and *tinylabels* (Version 0.2.3; Barth, 2022) for all our analyses.
